

The Tiguan

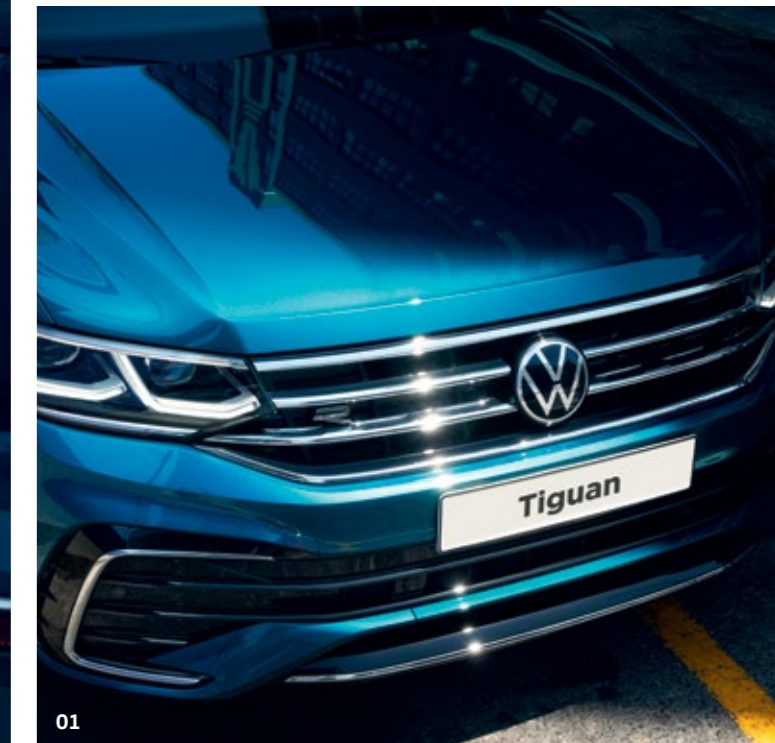

An extraordinary exterior

The Tiguan is a paragon of reinvention. This is also reflected in its progressive design. From its powerful proportions to the dynamic front section with precise lines to the pronounced shoulders, the vehicle's expressive silhouette focuses the eye on its strengths: innovative power, supremacy, and uncompromising functionality.

01 There's no mistaking the exciting Tiguan, with its striking new radiator grille, new narrow LED headlights and prominently displayed new Volkswagen logo all highlighting its strong, adventurous nature.

Intelligent light

The Tiguan is fully resplendent. This is not least ensured by the LED matrix headlights, optional for Life, and standard for Elegance and R-Line specification packages. They feature cornering lights and are supplemented with dark red rear lights as well as a dynamic high beam control for Elegance and R-Line packages: depending on the situation on the road, individual LED segments for light distribution are switched on or off selectively. This not only allows you to have relaxed car journeys, but also everyone driving in front of you or coming towards you.

Tiguan

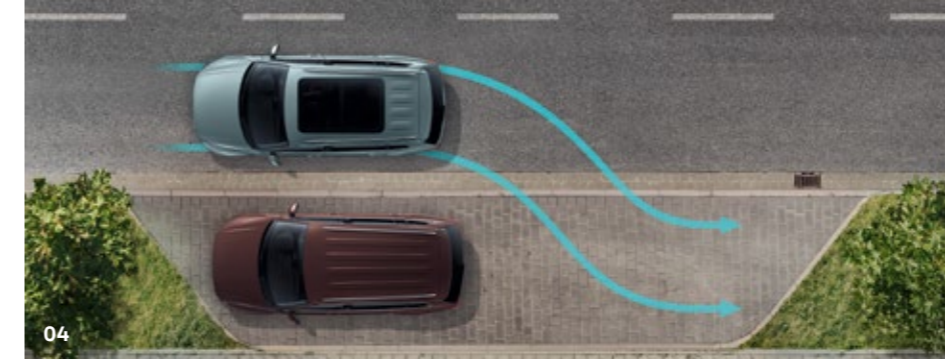

Innovative interior

The Tiguan's spacious interior is a place for forward thinkers: thanks to the intuitive controls of the driver-oriented cockpit, you can now concentrate entirely on the essentials. This is ensured by the standard multifunction steering wheel in leather and the touch-sensitive 'Air Care Climatronic' 3-zone electronic air conditioning, for instance. Or the Digital Cockpit Pro with its 10.25-inch TFT colour screen which comes standard for Elegance and R-Line. An optional 480W sound system by audio specialist Harman/Kardon ensures exceptional acoustics, while LED ambient lighting with a choice of 30 different colours, lets you create just the right mood for the occasion.

Driver's assistance systems

The Tiguan comes with a wealth of intelligent driver assistance systems designed to make driving as easy and safe as possible. Whether you are travelling on motorways or country roads, the latest technology keeps a constant eye on the road and your surroundings, monitoring the situation and reacting accordingly when necessary.

01 The 'ACC' adaptive cruise control adapts the vehicle's speed to that of the vehicle driving ahead up to the maximum speed selected, and maintains the distance set by the driver. (available in KSA only)

02 The **Front Assist** monitoring system combines Predictive Pedestrian Protection with City Emergency Braking, alerting you if it detects vehicles or pedestrians at the edge of the road or on the carriageway, via acoustic and optical signals, as well as a gentle application of the brakes. The system even performs an emergency stop should the distance become critical, helping to protect other road users and possibly avert potential accidents. (available in KSA only)

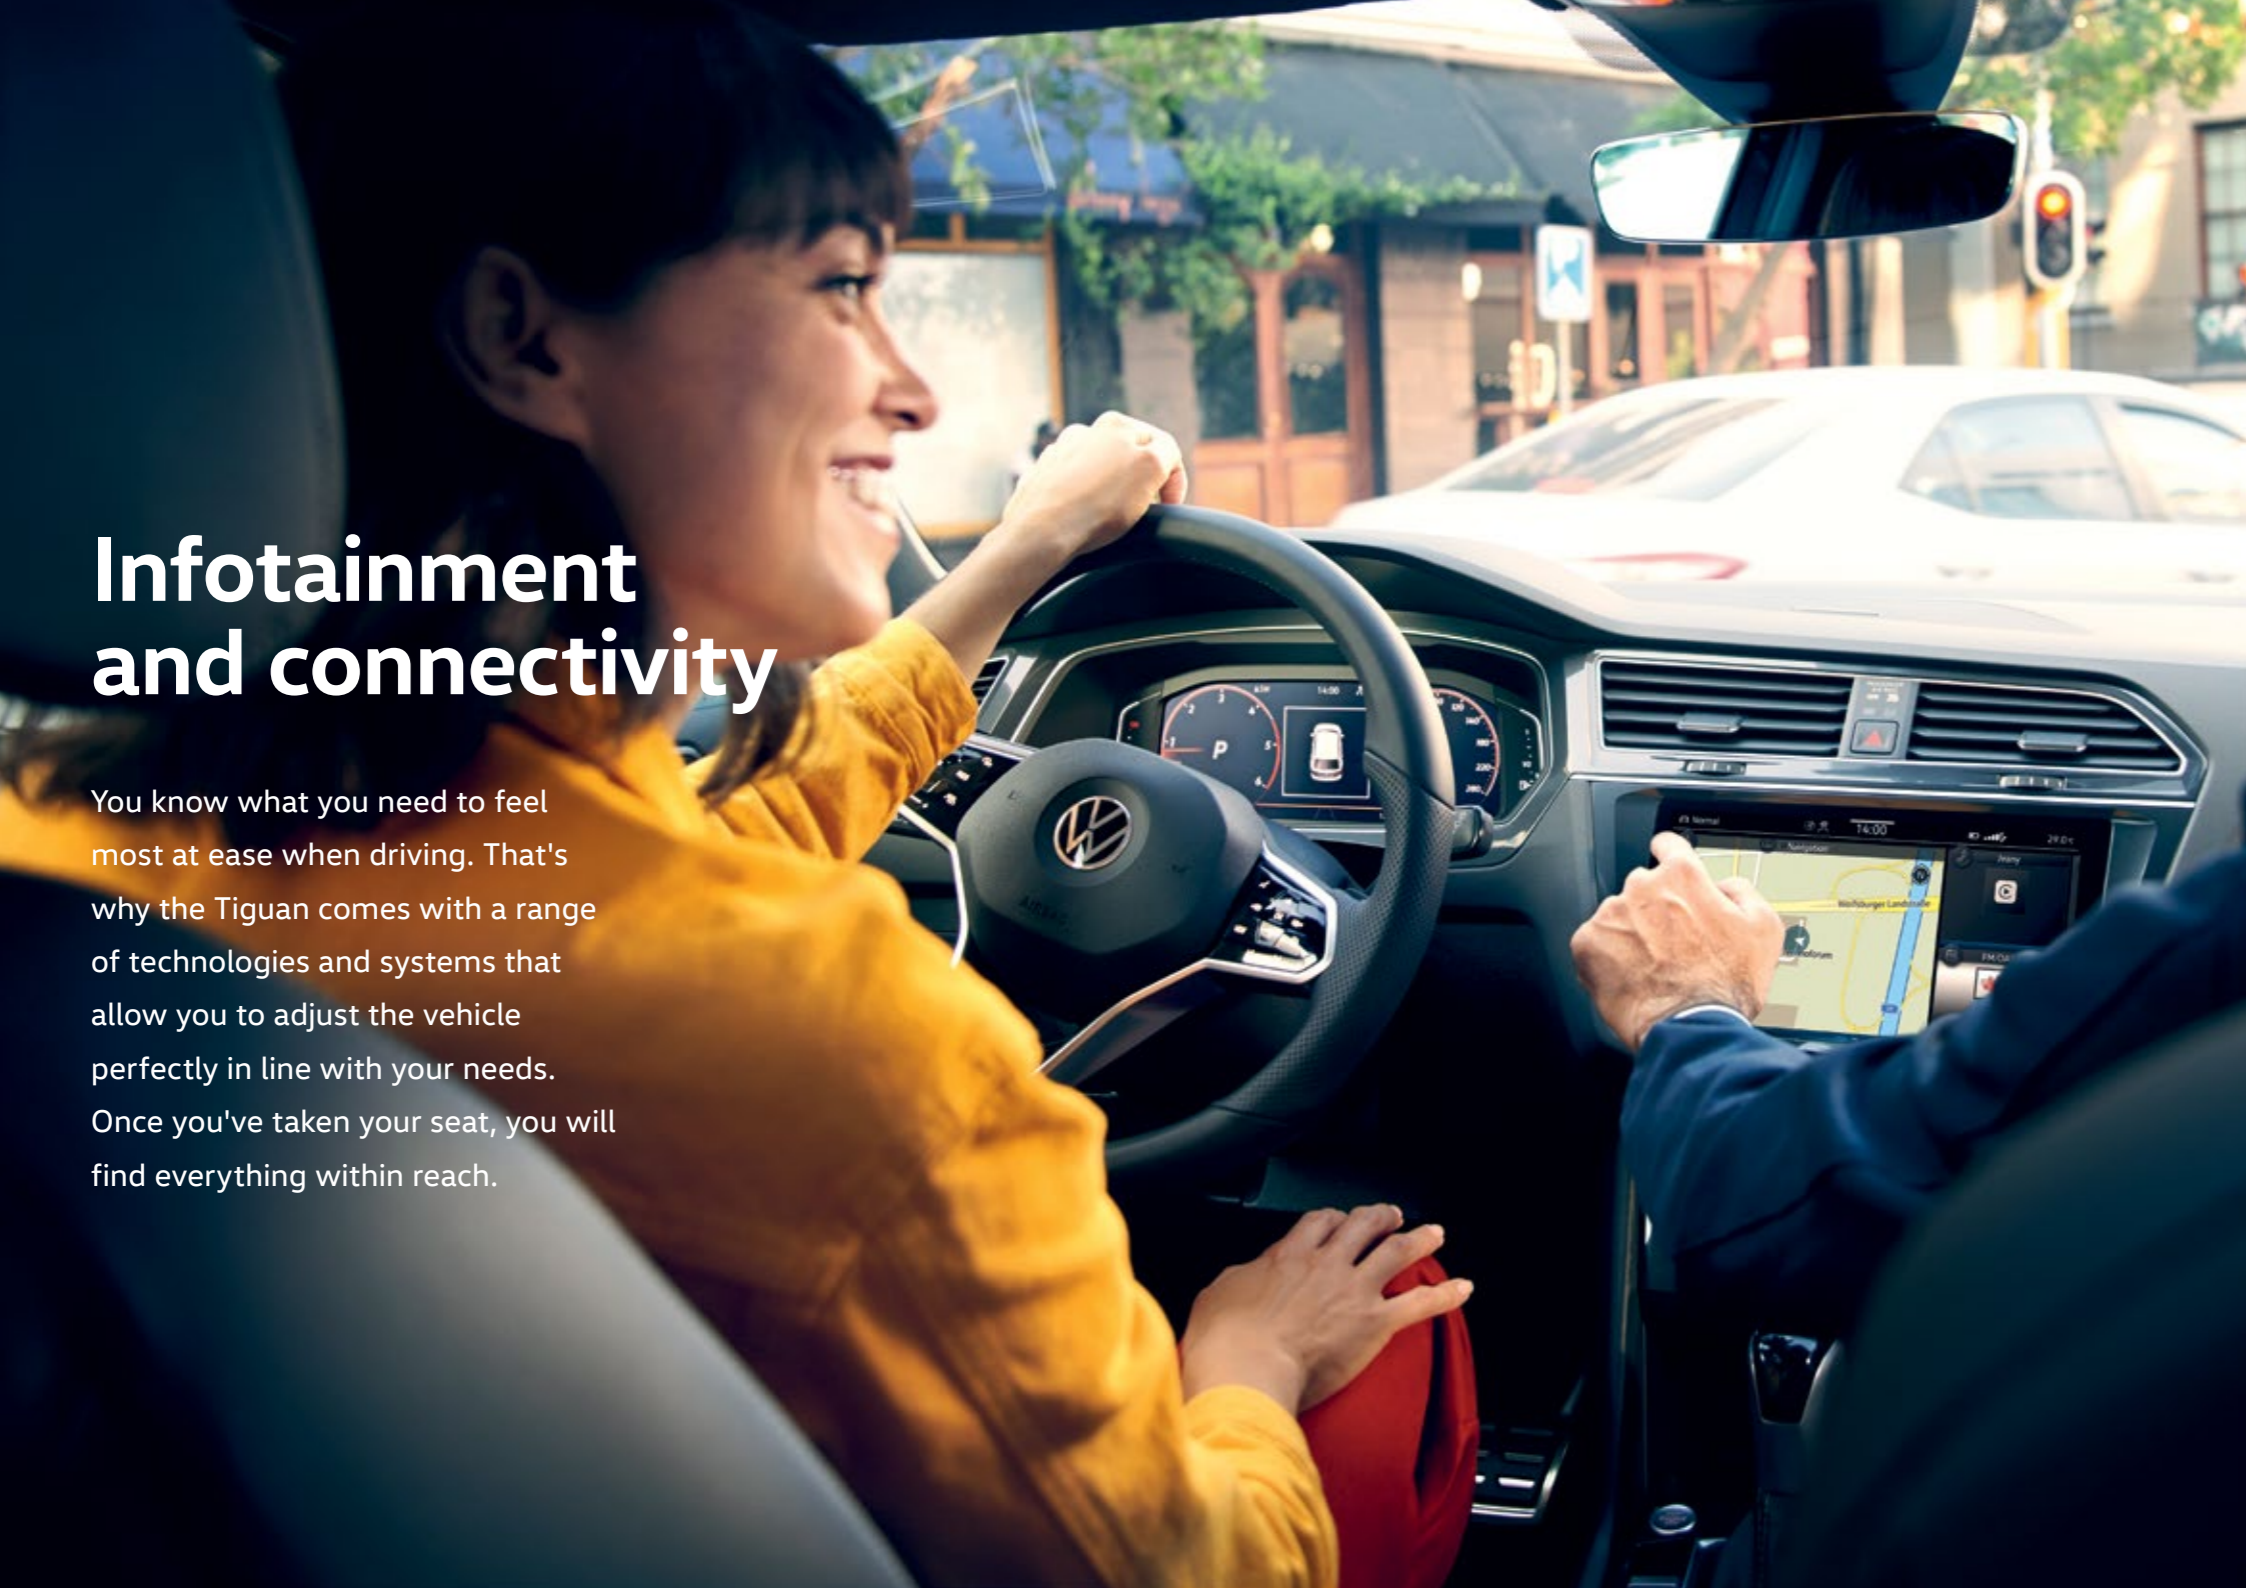

03 It doesn't just catch the eye, it also has its eye on everything: the **Area View 360° display** in the Tiguan streams up to twelve possible views of the vehicle (within each camera's range) live into the cockpit. This provides perfect support for the driver in almost every driving situation.

04 The **Park Assist** with rear view camera not only makes parallel parking easier, but also helps you reverse park into a space at 90 degrees to the kerb. Using ultrasonic sensors, Park Assist will detect a parking space large enough for either bay or parallel parking. Once the vehicle is in reverse, all the driver has to do is operate the accelerator and brake, and keep a look out, while the Tiguan steers itself into its chosen space. The rear view camera displays the area behind your vehicle on the screen of the vehicle's infotainment system, helping you to manoeuvre into tight spaces quickly and easily. Auxiliary lines help you navigate safely into parking spaces, and thanks to the high resolution display, even small obstacles such as kerbs are visible.

05 **Travel Assist** combines the Adaptive Cruise Control system (ACC) and the Lane Assist system to keep you in your lane, maintain a minimum distance to the vehicle in front of you, and prevent you from exceeding your pre-set top speed. Working together with a navigation system, Travel Assist is being extended by predictive cruise control and an assistant that allows the vehicle to react to bends. In conjunction with the Dual Clutch Gearbox (DSG), you can remain relaxed too while driving in traffic jams and in stop-and-go traffic. Emergency Assist is designed to take over control of the vehicle if the driver is unable to do so.

Infotainment and connectivity

You know what you need to feel most at ease when driving. That's why the Tiguan comes with a range of technologies and systems that allow you to adjust the vehicle perfectly in line with your needs. Once you've taken your seat, you will find everything within reach.

01 Keep an eye on everything – without ever having to look away from the road. Just the touch of a button is all it takes to raise the **Head-up Display** out of the dash panel, and display all key information such as speed, navigation data and traffic signs safely and comfortably in the driver's direct field of vision.

02 Whether you want to check the rev counter, speedometer, mileage recorder or your route: thanks to the high-resolution **Digital Cockpit Pro** which measures 10.25 inches across the diagonal, you can display a range of handy information in whatever arrangement you'd like, putting the focus on your favourite functions. For example, selecting navigation mode will move the speedometer and rev counter to the edge of the screen, making more space for the map display.

03 Depending on which smartphone you have, you can connect **App-Connect** via one of three interfaces: Apple 'CarPlay', Google 'Android Auto' or 'MirrorLink'™, allowing your smartphone display to be 'mirrored' on the infotainment touchscreen, and giving access to your favourite smartphone functions.

04 The **"Discover Pro"** radio navigation system can be operated via its 9.2-inch TFT touchscreen with colour display, proximity sensor, and gesture control. Its fascinating display options, and customised management of music and navigation data will inspire you, just like the eight loudspeakers and the hard drive. What's more, it is also equipped with a voice control system and a Bluetooth interface for mobile telephones, as well as a USB connection.

Black Style Package

Exceptional style is literally written all over the face of the Tiguan R-Line with the optional Black Style exterior design package. The radiator grille with the elegant R-Line logo comes in two colours: while the outer strips are finished in chrome, the two inner strips are in high-gloss black. The black mirror caps and window surrounds along with the darkened rear and rear side windows also demonstrate class without revealing too much. This is matched by the glossy black trapezoidal trim elements and the 19-inch Valencia alloy wheels in black. You also have the option of 20-inch Suzuka alloy wheels in black. This what a powerfully expressive appearance looks like.

Introducing Volkswagen Care

Peace of mind comes as standard when you join the Volkswagen family. Rest assured, you will always receive genuine care and transparent pricing from our network of authorised service centres.

Service Package

Thanks to our comprehensive services, you can hit the road without a care. Our Genuine Service provides a range of services that are designed specifically for your Volkswagen. In the event of repairs, we only install Volkswagen Genuine Parts®: High-quality, safe and tailor-made. So your journey is carefree and comfortable.

Warranty

We are focused on ensuring that you are happy with your Volkswagen and have less things to worry about as a new car owner. That's why when you buy a new Volkswagen from any of our authorised Volkswagen dealerships, we'll provide warranty cover to protect you against the repair costs of manufacturing and material defects within the specified warranty period.

Roadside Assistance

No matter where you are or what time of day it is, we've got your back. In most cases a breakdown can be resolved at the roadside, getting you safely back on your way.

Finance Options

Owning the Volkswagen of your dreams is easier than ever with our attractive finance options. High cost repairs won't wear you down anymore, as you can even choose to pay off your car service by paying in installments.

For more information on service packages, warranty and extended warranty, roadside assistance coverage and finance options, please contact your authorised Volkswagen dealership.
